# LOKENDRA SHARMA

## .NET FULL-STACK DEVELOPER

Jaipur, Rajasthan, India | +91 9119122262 | Lokendrash7@gmail.com | www.linkedin.com/in/lokendrash7

## PROFESSIONAL SUMMARY

.NET Full-Stack Developer with 4+ years of experience building, enhancing, and supporting web applications using C#, .NET Core, ASP.NET MVC, Angular/AngularJS, and SQL Server. Experienced in RESTful API development, Entity Framework Core, front-end performance improvements, cloud and IIS deployments, and production troubleshooting. Delivered solutions across e-commerce, government, fintech, and healthcare projects, collaborating with cross-functional teams in Agile environments. Focused on clean, maintainable code and reliable end-to-end delivery.

## TECHNICAL SKILLS

**Backend:** C#, .NET Framework, .NET Core, ASP.NET MVC, RESTful APIs, Entity Framework Core, SignalR, Redis

**Frontend:** Angular, AngularJS, ReactJS, JavaScript, TypeScript, HTML5, CSS3

**Architecture & Security**: Monolithic Architecture, Microservices Architecture, JWT Authentication, Role-Based Access Control (RBAC)

**Database:** Microsoft SQL Server (MSSQL), MySQL, MongoDB, database schema design, data access

**Cloud & Deployment:** Azure App Service, Azure Functions, AWS S3, IIS deployment, OCI Cloud

**Tools & Ways of Working:** Git/GitHub, SVN, Visual Studio, VS Code, Agile/Scrum, Kanban, debugging and testing

## PROFESSIONAL EXPERIENCE

**SmartSign Design Pvt. Ltd.** | **Software Developer |** *Sep 2025 – Present*

**Projects:** *SmartSign, MySafetySign, MyParkingSign*

- Enhanced e-commerce functionality by resolving Product Level Pages (PLP) issues, validating page functionality, and deploying verified updates to live environments.
- Improved website performance by optimizing database queries using Entity Framework Core (EF Core), implementing Azure Cache for Redis, and refining application workflows to reduce unnecessary processing and improve responsiveness.
- Designed and implemented RESTful APIs to support frontend-backend integration, business workflows, and seamless communication between application services.
- Worked with .NET Core microservices to implement business logic, integrate backend services, and improve application modularity, maintainability, and scalability.
- Used Entity Framework and Entity Framework Core for data access, database operations, query optimization, and application data management.
- Implemented frontend performance optimizations targeting Core Web Vitals and Google Chrome UX Report (CrUX) metrics, contributing to a reported 60% improvement in website performance.
- Designed and optimized Azure SQL database structures and queries to improve data retrieval efficiency, query performance, and storage flexibility.
- Configured and maintained Azure DevOps CI/CD pipelines to streamline application builds and deployments to server environments, improving release consistency and reducing manual deployment effort.
- Integrated Sentry for application error monitoring, enabling faster identification, investigation, and resolution of production issues.
- Improved CDN delivery and investigated third-party scripts affecting page performance, addressing rendering delays and other frontend bottlenecks.
- Followed Agile development practices, participated in daily stand-ups, and used Git for version control, collaborative development, and code management.

**BR Softech Pvt. Ltd. | Software Developer |** *Jan 2024 – Sep 2025*

**Projects:** *IIT Roorkee Faculty Selection, AIIMS Nagpur, Game Master Admin, ICAR, Query Management, Group Chat Application*

- Developed and maintained end-to-end web applications using C#, ASP.NET Core, Entity Framework Core, Angular, and AngularJS for government and enterprise clients, delivering integrated frontend and backend functionality.
- Designed and implemented .NET Core backend services and RESTful APIs, developing reusable business logic and supporting scalable application workflows.
- Worked with monolithic and microservices architectures to implement business functionality, organize application components, and improve maintainability.
- Developed microservice-based backend components to separate application responsibilities, improve maintainability, and support modular application development.
- Implemented application workflows for IIT Roorkee Faculty Selection and AIIMS Nagpur, supporting application submissions, approval processes, departmental query assignment, tracking, and resolution.
- Configured AWS EC2 instances and deployed IIS server, .NET Core applications, managing hosting and server troubleshooting.
- Integrated AWS S3 for secure document and file uploads, enabling reliable file management across multiple enterprise applications.

- Deployed and maintained applications on Microsoft Azure App Service and IIS, troubleshooting deployment issues and supporting production application reliability.
- Built dynamic, responsive interfaces using Angular and AngularJS, integrating frontend components with backend APIs and improving usability across application workflows.
- Investigated application defects, tested API integrations, resolved functional issues, and maintained code quality throughout the development lifecycle.
- Used Git/Bitbucket for source control and collaborative development, participated in Agile workflows, and documented technical specifications to support knowledge sharing and maintainability.

**Ambient Diagnostic & Research Centre Pvt. Ltd. | Software Developer |** *Jul 2023 – Jan 2024*

**Projects:** *LIMS Soft*

- Designed, developed, and maintained laboratory management application modules using .NET Core, integrating backend services with responsive frontend components.
- Worked with microservices architectural approaches to support laboratory workflows, module integration, and maintainable application development.
- Developed and enhanced frontend components using React.js and integrated them with backend APIs for laboratory operations.
- Implemented RESTful APIs and JWT-based authentication to support secure communication between frontend applications and backend services.
- Developed laboratory instrument communication modules to capture and process diagnostic data, streamline workflows, and automate report generation.
- Implemented data access layers using Entity Framework, managed database schema changes, and optimized data retrieval to maintain data consistency and reliability.
- Performed functional testing, troubleshot application defects, and enhanced existing features to improve system stability and performance.

**Ezytm Technology Pvt. Ltd. | Dot Net Developer |** *Mar 2022 – May 2023*

**Projects:** *Website CMS, Great India Pay, HRM, APIBox*

- Developed and maintained scalable web applications using .NET and Entity Framework Core, supporting fintech services, mobile recharge platforms, and e-commerce products.
- Worked with microservices architectural patterns to support application Payment functionality, service integration, and maintainable backend development.
- Designed and implemented RESTful APIs to support frontend-backend integration, business workflows, and seamless communication between application services.
- Integrated **Paytm**, **PayU**, and **Razorpay** payment gateways, implementing payment workflows for fintech and e-commerce applications.
- Used Git for source code management, version tracking, and collaborative development. Performed application testing, participated in code reviews, and maintained technical documentation within Agile/Scrum workflows.

## EDUCATION

**B.Tech —** Arya Institute of Engineering & Technology, Jaipur (Rajasthan Technical University) | 2021–2024 | CGPA: 7.11/10

**Diploma —** Govt. Ramchandra Khaitan Polytechnic College, Jaipur (Board of Technical Education, Jodhpur) | 2017–2020 | 60.00%

**12th (RBSE) —** MHS, Tilak Nagar, Jaipur | 2016–2017 | 65.68%

**10th (RBSE) —** AVM, Malviya Nagar, Jaipur | 2014–2015 | 62.67%
